**Centre for Childhood
Development and
Early Care**

LUIS SUÑER SANCHÍS

WHO ARE WE?

We are a child development and early care centre approved by the Department of Social Services, Equality and Housing, with Quality certification according to ISO 9001. Our Centre offers its services free of charge, and is owned by LA NOSTRA VEU Association for Functional Diversity.

WHO ARE WE ADDRESSING?

We are addressing children from 0 to 6 years old with developmental disorders or at risk of suffering from them and their families.

OUR OBJECTIVES ARE:

- To boost the families competences.
- To coordinate with health, school and social services.

SERVICES WE OFFER :

- Comprehensive development support.
- Functional evaluation of the child.
- Information on the general development of girls and boys.
- Support for the family.
- Information on other resources in the environment.
- Support for schooling.
- Development of technical aids.

HOW DO WE WORK?

At our CDIAT we work from an approach focused on the child's and family's environment. We start from their abilities and resources, taking into account their daily routines.

To do this, our families have a reference professional who carries out a transdisciplinary approach with the support of the multidisciplinary team made up of psychologists, stimulation technicians, physiotherapists, speech therapist and occupational therapist.

Our intervention is developed through individualized programs, in which parents together with professionals establish the goals to be reached and the strategies to achieve them.
